Séance 5: Linux
Utilisation chmod (-+=)
Utilisation chgroup pour groupe(root ou ynov)
Utilisation chown pour propriétaire(root ou ynov)

```
memodebanals-/mareu/seascots educated security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/massisted/security/mass
```

après erreur au vu du chmod (mal lu le doc avec l'utilisation des - à la place des +)j'ai recommencer correctement :

```
oot@Debian10:/home/ynov/Bureau/Seance5# chmod u+rwx,g+rx-w,o+rx-w fichier.txt
root@Debian10:/home/ynov/Bureau/Seance5# ls -l
